I am a skilled frontend engineer with 2 year of experience in developing high-quality web applications. I am proficient in HTML, CSS, JavaScript, with little experience in some frontend frameworks, including React and Vue.js. I have a strong understanding of website development best practices, including performance optimization and accessibility. I recently started learning Data Analysis, and it has been going well so far

PROFESSIONAL EXPERIENCE:

AUGUST 2021 – APRIL 2022

STUDENT, UDEMY [ONLINE]

Instructors from around the World teach millions of students on Udemy, and I fortunately happen to be one of the students, I learnt web development there and I took the first course in my tech journey and career.

- I built about 5 projects using HTML, CSS & Bootstrap.
- Learnt the basics of JavaScript.

APRIL 2022 – APRIL 2023

STUDENT, ALTSCHOOL [ONLINE]

AltSchool is an online engineering school I joined, it is 1 a year course which also helped me in my tech career and journey, after 1 year of learning and meeting with the requirements of the course of study, I got a diploma certificate

- I started my JavaScript journey at AltSchool,
- And built a few projects with JavaScript
  - There I also learnt about Vue and React, which I later built some websites with.
