## Profile

I am a budding frontend developer with a solid foundation in HTML, CSS, and Bootstrap, and hands-on experience with JavaScript and modern frameworks like React.js and Vue.js. I have a growing understanding of website development best practices, including responsive design, performance optimization, and accessibility. My adaptability and commitment to continuous learning are complemented by my exploration of data analysis and SQL. I am currently learning SQL, focusing on data extraction, querying, and database management. I also work with Excel for data cleaning and analysis, and I am developing my skills in Power BI and Tableau for data visualization. My goal is to leverage data to uncover insights and support decision-making.

## Professional Experience

02/2024 – 06/2024
